

Institute for Marine and Antarctic Studies

Honours Scholarships 2010

IMAS will offer up to **five scholarships** to students undertaking an honours program in the field of marine and Antarctic studies and supervised by a staff member of IMAS.

A list of potential projects and supervisors is available at www.imas.utas.edu.au

\$5,000 each

IMAS offers an exciting range of options for honours study within three broad areas of research:

Sustainable Marine Resources: focuses on the Tasmanian marine natural resource field with emphasis on the development of Tasmania's wild fishery and aquaculture industries

Climate and Antarctic Futures: focuses on marine ecosystems, including coastal and estuarine, in the context of climate change, and includes ecosystem and marine systems modeling; the consequences of change on marine biodiversity and ocean environments from Australia to Antarctica; evolution of the Southern Ocean

Australians and the Sea: focuses on the interaction of humankind on the whole marine environment, from ocean policy through harvesting regimes to bio-security, seafood quality and seafood product supply chain.

Apply online at www.scholarships.utas.edu.au
